

How to use RFID on the platform

1. First open the fleet module on the MettaX IOT platform

2. Create a new vehicle in the vehicle information module and bind the device that needs to be installed with RFID card punching.

3. Then create the driver information and bind the vehicle used by the driver.

4. After using this driver-assigned card to punch in the card puncher, clicking Reading Device in the RFID column of the driver's information will be able to read the Device's most recent card ID, and bind the card ID to the driver's information.

5. The driver and vehicle information for each clock-in can then be viewed in RFID Report.
